Nothing in her childhood indicated that she would, while still a young woman, secure for herself an honorable place among English writers. She was shy and silent. Her brothers and sisters called her a dunce, and not without some show of reason; for at eight years of age she did not know her letters. An education, however, which to most girls would have been useless, but which suited Fanny's mind better than elaborate culture, was in constant progress during her passage from childhood to womanhood. The great book of human nature was turned over before her, and every marked peculiarity instantly caught her notice and remained engraven on her imagination. When she was fifteen her father took a second wife, and the new mother insisted that nothing could be
